## Attendance and Final Preparation

Attendance is especially important in the lead-up to, and throughout, the examination period. In the remaining teaching weeks before exams begin, teachers will be revisiting key topics and supporting pupils in developing a positive and confident approach to their achievement. During this time, some examinations will also take place in German, Art, Photography and Textiles.

Revision is not just important up to the first exam—it is vital right through to the final paper. Pupils who try to manage the entire revision process independently often achieve less than they are capable of, compared to those who continue to engage fully with lessons and teacher guidance. Our teachers are the experts and are best placed to support students in maximising their potential. We strongly encourage all pupils to attend school every day until the end of the exam period, giving themselves the very best chance of success.
